

IN THE CLAIMS

Please amend claims 1 and 2 as follows:

Sub C
BT

1. (Twice Amended) A method for dynamically displaying data values, comprising:

- transmitting results, [associated] sub-items associated with the results, and rules of enforcement of sub-item combinations in a predefined format from a server to a remote client through a communications interface in response to a request from the client to the server;
- displaying a first set of results on a client display device;
- processing the results in real time using the client computer in response to user adjustment of the results and sub-item configuration on the client computer; [and]
- preventing sub-item conflicts [with] using the transmitted rules of enforcement; and
- dynamically displaying the processed results on the client display device.

Sub C
B2 cont

2. (Once Amended) A display device having rendered thereon dynamically changing results of a database query, comprising:

- a set of results, [associated] criteria associated with the set of results, and rules of enforcement of the criteria being stored as information on a server, wherein the information is transmitted from the server to a remote client that made a request for the results for display on the client, the information being transmitted as encoded data;
- at least one dynamic output; and
- at least one adjustable interface option displayed on the client adapted to enable adjustment by the remote client of the associated criteria confined within the transmitted rules of enforcement for causing the dynamic output to change in
